MOBILE SOLUTIONS

Why We Invested in a mobile solution

"It takes both innovation and skill to assemble a high end FLYPAK™. Watermark HD chose TVPG to build its first HD FLYPAK™, and the end result is top-notch. I can think of no better group to work with when dealing with such cutting edge equipment."

Shaun Halladay,
President Watermark HD

"All-Star video tapes amateur sports. The small van and mobility of the FLYPAK™ make it easy for my crew to run less cable, fit into small locations on school playing fields, and into boxing clubs and other venues."

Trent Eye Owner of ASEP

"The FLYPAK™ is great! The initial reaction by the students and myself is this is a serious machine. All of the components work well, and it is easy to use. I am looking forward to using it in my future classes."

James Bock,
Faculty at Framingham State College

WHY TV Pro Gear?

- Industry leader in integrating mobile solutions
- Have been in business for over 12 years strong
- Turnkey Integrator. The one stop shop
- Integrating solutions to fit your needs and budget
- Superior design and engineering
- Creative and Innovative Workflow Design
- Detailed needs assessment
- Superior standards of workmanship
- Project Portal for customer collaboration during the project
- Certified and Supported by leading manufactures
- Scalable, adaptable, future proof designs
- Extensive documentation on engineering & wiring
- Superior customer and technical support
- Extensive history and client base with mobile solutions
- Your strategic partner
- We are here to support you

TV Pro Gear offers many mobile solutions for the Production, Broadcast, and Post industries. As a Turnkey Integrator, our services include Design, Engineering, Wiring, Project Management, providing equipment acquisition, integration, configuration, configuring the equipment, training your staff, and providing longer term support.

Our mobile solutions can be integrated into Vehicles, Trailers, Vans, or our unique FLYPAK™. Every mobile solution we build is customized to our client's exact needs and budget.

The following is brief overview of the types of Mobile Solution we can provide. For additional information one of our customized Mobile Solutions, please contact an Integration Sales Specialist at 800.TVPROGEAR, or go on the web to www.tvprogear.com and download brochures, white papers, current news, and case studies on specific solutions.

Production

If it's a HD or SD Production Vehicle, Van, Sprinter, or Trailer, we can build it! Mobile Production solutions come in all different sizes with different capabilities for different budgets, whether it's a small 3 camera production trailer that cost less than \$100,000 to large Bump Out Production Vehicles with 10+ cameras that can cost more than \$3,000,000.

Broadcast

Broadcasting live sport events or military applications, TV Pro Gear can integrate you a mobile HD or SD uplink solution. Mobile Uplink antennas come as small as 1 meter for VSAT (remote IP) needs to as large as 4.5 meters for military or uncompressed HD needs. Broadcast solutions can be integrated into Vehicle, Vans, Sprinters, Trailers, or Flypaks™.

Post

Besides integrating Post Facilities, our team can integrate a Post Solution on wheels for you. For a low cost small footprint solution, we can integrate any Post Solution into a Flypak™. Or, we can take you to the next level and integrate a multi seat Post Solution on SAN within a Vehicle, Van, Trailer, Motorhome, or FunMover.

HD FLYPAK™

Our unique custom built HD / SD FLYPAK™ is the ultimate solution if you are looking for a turnkey mobile production solution with small foot print. With the same capabilities and quality as a Production Vehicle, the FLYPAK™ can roll into buildings, go into elevators and can easily be transported, with setup times of less than 30 minutes.

SNG/ENG

If you are a live news Broadcaster, our NewsCaster is the right solution for you. Depending if you need Microwave within the City, a small uplink for remote areas, or a hybrid. For both, we can build the NewsCaster into a traditional Sprinter Van, Box Truck, or even a smaller vehicle such as a Ford Explore or Mini Cooper.

FileCaster

The FileCaster™ is a hybrid vehicle that we have design to fulfill all your needs for traditional production and broadcasting to the new cutting edge forms of production and broadcasting. Being capable of a multi camera Tapeless and Tape production to broadcasting live over fiber, microwave, Satellite uplink, Vsat, and the Internet.

Tour Bus Studio

Travel in comfort and show up in style. We can take a European style Coach, or Bus, such as the Prevost, build in a full side bump out, and then turn half of the bus into a video, audio production or post production solution, while the other half remains living quarters during travel.

Mobile Audio Booth

The schedules for highly sought after talent often require adlib on location recording in noisy or imperfect working situations. If you're constantly scrambling for great sound while on location at places including concerts, sporting events, outdoor film shoots, TV Commercials or anywhere else then you're probably in need of a Mobile Audio Booth solution with 50db+ sound-proofing, a turnkey audio booth with ProTools capability on wheels.

Command Centers

If it's for government, military, corporate, or private use, a mobile command center is often needed for emergency, strategic, or flexible dispatching. Your mobile command center can include a VSAT solution for IP Phone and Internet, Uplink for Video / Audio transmission, Radio Frequency Transmitters / Receivers, Video Security monitoring, and a design that allows efficient working space for multiple people.

HD & Digital Upgrades

Already own a vehicle? Are you looking to upgrading it from SD to HD or Analog to Digital? Let us help you plan the upgrade, design and engineer the new layout, it's functional capabilities, and integrate the upgrade. We will repurpose as much of your legacy equipment while providing the new equipment required to perform the upgrade.

WHO IS TV Pro Gear?

TV Pro Gear (TVPG) is a leading systems integrator and mobile solutions provider, serving the broadcast, corporate, government, worship and education markets.

TVPG was founded by veterans of the broadcast industry. The founders saw an opportunity to provide the kind of service and support that they would have liked to have had during their time in the industry.

Our projects are as diverse as our clients. We have projects ranging from a single turnkey edit system, to designing and building multi-million dollar broadcast facilities and production trucks.

TVPG brings to every project a superior organization with the depth and the knowledge to deliver solutions that are cutting edge, scalable and future proof regardless of the project size.
